

## ADAM SALTZ, DMD, MS, MPH PRESENTS:

# Translating Periodontal Diagnoses into Clinical Practice & When Bad Things Happen to Good Implants

*In-Person Event 6 CEUs Lecture Format*

*New Speaker*

Friday, April 5, 2024

9:00 am—5:00 pm

6 CEUs Full Day Lecture

Delta Hotel by Marriott  
1117 Williston Rd.  
So. Burlington, VT 05403

### Schedule for the Day:

Registration Opens: 8:15am

Lecture: 9 am-12 pm

Lunch: 12-2 pm\*

Lecture: 2-5 pm

*\*Northeast Delta Dental will  
conduct their annual business  
meeting during lunch.*

Early Bird Fee: thru 3/15/24  
Registration Deadline: 4/1/24

### Translating Periodontal Diagnoses into Clinical Practice

Patients with advanced periodontal destruction pose a unique challenge to the restorative dentist. Tooth loss, increased mobility, and severe attachment loss complicate ways to restore a patient's function and esthetics. Systemic health plays an increasingly important role in the periodontal-restorative interface. Arriving at the proper diagnosis and prognosis for patients with poor oral and overall health will improve the way we rehabilitate an otherwise hopeless dentition.

**At the completion of this program, participants will be able to:**

- Stage & grade periodontal conditions using the new classification system
- Diagnose & prognosticate cases of advanced periodontal breakdown
- Identify & manage systemic diseases during dental treatment
- Understand how perio surgery can be incorporated into prosthetic reconstructions

### When Bad Things Happen to Good Implants

Implants cannot be placed, restored and forgotten. It is important for patients to understand their implant maintenance regimen and what site, systemic, or esthetic risk factors may predispose them to complications from the start. Providing patients with a comprehensive roadmap of their implant treatment with personalized informed consents will result in lasting esthetic and functional outcomes free of surprises and limited in complications.

**At the completion of this program, participants will be able to:**

- Identify site, patient, and esthetic-related risk factors for peri-implant complications
- Avoid and manage a variety of problems in implant surgery
- Navigate challenges in implant prosthetics as they arise

**Speaker Biography** Dr. Saltz graduated from the UT Health Science Center at San Antonio, where he obtained his MS degree and Certificate in Periodontics. He completed his dental training at Nova Southeastern University and received a Master of Public Health degree. Dr. Saltz actively publishes in and reviews for several scientific journals on periodontal and peri-implant disease, digitized implant workflows, and immediate implant placement and loading protocols in the esthetic zone. He lectures nationally and is vice president of the Main Dental Association. He formerly taught at the University of New England and currently serves as faculty consultant at Kansas City University, where he developed their predoctoral periodontal curriculum. He is a Diplomate of the American Board of Periodontology and maintains an active practice in South Portland, Maine. *Dr. Saltz has indicated that he has a.) financial relationship in support of this program and b.) no conflicts of interest.*
