

DR. ROBERT A. LOWE PRESENTS:

**“Creative Treatment Planning in Restorative
Dentistry: Ortho/Perio/Restorative Considerations”**

December 6, 2019
9:00am– 4:00pm

**DoubleTree by Hilton
(formerly the Sheraton)**
870 Williston Road
Burlington, Vermont
**6 CEU’s for a full day
lecture**

In this technique filled seminar, Dr. Lowe will discuss innovative solutions and restorative techniques that will expand your treatment options for many types of aesthetic and functional dental problems. Direct composites can be used creatively in the direct fiber reinforced composite bridge and bioclear physiologic matrix for “Black Triangle” and diastema closures. Indirect prosthetic treatment is dependent on anatomic preparation design, tooth morphology and occlusion. And when it doesn’t all go by the book, there are creative solutions to functional problems, prosthetic tooth repositioning, and bite restoration (without surgical intervention). Dr. Lowe will detail step-by-step procedures that if practiced, can impact on your ability to deliver an improved level of artistic and functional dentistry.

Schedule for the day:
Registration opens
8:30am
Lecture: 9am 12pm
Lunch: 12 1pm
Lecture: 1 4pm

LEARNING OBJECTIVES:

- Understanding the importance of occlusion and tooth morphology on prosthetic outcomes
- Learn the importance of biologic provisionalization in overall case management
- Learn proven and “flawless” master impression making
- Understand restorative margin position relative to the bony crest based on biologic width numbers
- Understand how canorthognathic and orthodontics can be done with only Crown and Bridge

Speaker Biography: Robert A. Lowe, FAGD, FICD, FADI, FACD, FIADFE, FASDA

Dr. Lowe received his DDS degree, at Loyola University in 1982, he has maintained a full time practice for 30 years, and is a world recognized teacher and clinician. He taught for 10 years at Loyola University School of Dentistry and has received Fellowships in the AGD, ICD, ADI, and ACD.
